**BRIEF DESCRIPTION OF AGRUMENTS TO BE PRESENTED:**

Applicant agrees that Long shows a preloader in Fig. 9, col. 7:22-33; however, Long teaches rewriting code according to native endianness. Long does not show rewriting a bytecode to a new bytecode which indicates that at least one of the class and the superclass requires execution of the static initializer when it is determined that the bytecode makes the active reference to the class which requires the execution of the static initializer, as recited in claim 1.

\*Note: This form should be completed by applicant and submitted to the examiner in advance of the interview (see MPEP §713.01). This application will not be delayed from issue because of applicant's failure to submit a written record of this interview. Therefore, applicant is advised to file a statement of the substance of this interview (37 C.F.R. 1.33(b)) as soon as possible.
